My dynamo, dynamo, it's hard to keep the animo from  
driftin' away nowadays  
The horror, the pain, let's get into details, the bass, the  
piano, the friction of dynamo  
The first draft of a worst case scenario

Every thought is at some way of of keeping the flavor,  
like their going for the brain to chew on  
Compatible allies and as dead as a dice, it's the thing  
between nowhere and the opposite side  
It's the something hidden behind the eloquent surface,  
father of fuckups you did it on purpose

I decline to believe that it's personal, hey, I know that  
you do and I'll hold it against you  
It's the bald man's dream to grow hair, baby, but a  
lame don't need legs, he needs a wheelchair

So if you're to busy in having too much to offer and you  
can not decide where to go  
Do the low yo yo, take a swing at the dynamo on a day  
like this  
It's hard to keep the animo from drifting away

One-liner: the greeks had it carved in a tombstone,  
'epigram' they said, last tribute to the dead  
Well the horror, the pain and the alphabet from a to  
migraine, from nausea to z.  
Are you listenin' you fool, you magnificent liar?

Feel free but don't feel too comfortable, it's already a  
quarter to three

Oh they say that time presses, but time doesn't press  
It's just a figure for motion and emotional unrest  
It's a matter of seeing and of being seen  
As far as I'm concerned time is the state of my jeans

So if you wanna come down for some hangin' around  
If you wanna come down for some hangin' around  
If you wanna come down for some hangin' around

If you wanna come down for some hangin' around

Oh dynamo, dynamo, it's hard to keep the animo from  
driftin' away nowadays

The horror, the pain, let's get into details, the bass, the  
piano, the friction of dynamo

The first draft of a worst case scenario

It's the first draft of a worst case scenario, it's the first  
draft of a worst case scenario

It's the first draft of a worst case scenario, it's the first  
draft of a worst case scenario

It's the first draft of a worst case scenario, it's the first  
draft of a worst case scenario

It's the first draft of a worst case scenario, it's the first  
draft of a worst case scenario

It's the first draft of a worst case scenario, it's the first  
draft of a worst case scenario

It's the first draft of a worst case scenario, it's the first  
draft of a worst case scenario
