Surviving in the deadly night  
Looking at an empty face  
Visions through an empty sight  
A disadvantage of the human race

A recreation of my ripping death  
They hold my body try to break my head  
Terror rising as I take my last breath  
All is quiet while my souls undead

As my corpse lies without a fear  
Reminiscing on the days of fear  
All I thing is of the time when I cried

Now is past forth and my poor soul has died

Death-reborn-faith-castout-mind-in shock  
Soul-it dies.  
Driven-insane beyond fear

Battle- I will stand alone  
The many seek my fortune  
I will haunt them forever.

When I see hell awaiting  
Reel within my eyes thus far  
Rigormortis sets inside my mind  
I will be coming back for more
