in our youth we must have been blind, no conditions,  
none,  
friends easy to find, but we grew up set in our ways,  
now what's  
happened it's worse every day  
I've opened up & still you can't see, don't  
hear my words you don't understand me  
I'm trying hard & i don't want it to end  
hey what happened? we used to be friends. now it  
seems

that we're so used to it become so normal cant do  
without  
it, not by choice, you say you do it by habit  
too much fighting you know i don't want it. we grew up,  
i guess that just depends  
we grew up, does that mean we're not friends
