Did you remember it was summer when we met  
I still think about the things i said

We were both stuck falling  
in and out of love  
I don't know what we both  
were so afraid of

I thought that I could tell what we could be  
But you were someone else  
standing next to me

Devon Werkheiser What did i miss? Lyrics

All the nights we spend  
What i thought it mend  
Now its come to this  
What did i miss?

Build you up so much  
But when our lips first touched  
It was just a kiss  
What did i miss

Did you remember in the autumm in the spring  
Hanging out not do of mention anything  
Until you finally caught that flight  
back out to me

Then we lay down in my arm begin till morning

I thought that I could tell what we could be  
But you were someone else  
standing next to me

All the nights we spend  
What i thought it mend  
Now its come to this

What did i miss?

Build you up so much  
But when our lips first touched  
It was just a kiss  
What did i miss

All the nights we spend  
What i thought it mend  
Now its come to this  
What did i miss?

Build you up so much  
But when our lips first touched  
It was just a kiss  
What did i miss

All the nights we spend  
What i thought it mend  
Now its come to this  
What did i miss?

Build you up so much  
But when our lips first touched  
It was just a kiss  
WHATDIDIMISS?
