Going out tonight to get you off my mind
Your eyes are like a loaded gun,
Your breath is like a summer night
I think it's funny with every look you kill,
It holds the power to keep me on or off the ground...
So keep me on the ground tonight

Don't cry this time
We all know what it's like
This dynamite has blown up my heart
Don't cry this time
We all know what it's like
Wont you die tonight
Wont you die tonight

I thought of a million lines to say if i got the chance
I'd call you on the telephone, call 911 to clean up the
mess

Oxygen means nothing when you look into my eyes
So look at what's inside
One last breath and one last goodbye

Don't you fall asleep tonight behind the wheel
Because this night is wild...
And i wont be there this time to save you
When it's all said and done,
Ill be lost in thoughts of you
And you will dry up every tear with your red blood
Just die tonight so we know what it's like
Just die tonight so we know what it's likeâ€¦|â€¦| wont you
die tonight
