

## Di-Rect "She"

Visit "[She](#)" on [MotoLyrics.com](http://MotoLyrics.com)

She, she's a mistery  
She's a magic woman  
A puzzle to me...  
How she makes me fly  
I'm happy you see...  
Who would not fall in love -  
With that look in her eyes,  
Or that smile  
She's an angel...  
Who would not feel the bliss  
After one single kiss  
From her lips  
She's an angel  
She, she's a symphony  
An enchanted rhapsody  
Waiting for only me  
And she makes me cry  
'cause I'm happy to see  
Who would not fall in love  
With that look in her eyes  
Or that smile  
She's an angel...  
Who would not feel the bliss  
And the one single kiss  
From her lips...  
She's an angel  
Only covered eyes  
Couldn't ignore her beauty  
Coz' she came straight from heaven  
Who would not fall in love  
With that look in her eyes  
Or that smile  
She's an angel...  
Who would not feel the bliss  
And the one single kiss  
From her lips...  
She's an angel (7x)
