Oh honey please
You're a walking disease
And no longer my desire
You won't change my mind
No not this time
I'm gonna walk through the fire
You don't look so proud
When there's shit all around
Trip and smell what you've become
Floatin' out in space
Or any fuckin' place
It's All the same when the sun goes down

I don't, I don't need your love
(I don't need your love)
When the fires out there aint no doubt
(I don't need your love)

I know what you believe
You Gotta mouth that deceives
You're Like a bullet with a smile
Start a fight Hell set it alight
You aint been sane for quite a while
Your Talking with your friends
There's Hate me to no end
They love to watch me drown
But With a dirty mouth
The bitch is going south
Another jewel in her crown
(I don't need your love)
When the fires out there aint no doubt
(I don't need your love)
