"Make It Begin"

Visit "[Make It Begin](#)" on MotoLyrics.com

You roll around me
like a silent wave
You touch my soul
and make me crave you all over
You share the secret
sounds I make
you build a love that
fills a void
You make my body shake
You play that music
that makes me wanna sing
You shape my mind, you draw a picture

you're my friend
You understand the waves in my head
that never crash and never end
Make it begin
Let me ride you
let me find you there
where the oceans touch the land
The centre is space not time
let's make a flight
