Hey now
I know it's not that easy
Tryin' to make it through your twenties
In a world that feels so big
Right now
I know we found a good thing
We don't have to go on searching
Anymore

Stay with me
Cus I'm right where you should be
We've got all that we need
If you stay
Stay with me

Sometimes

It gets a little lonely
When people try to pull me
Try to pull me down
But thats the past now
And the future is a mystery
And in the present I am living
Oh

Stay with me
Cus I'm right where you should be
We've got all that we need
If you stay
Stay with me
