Keep an eye  
Keep an eye  
Keep an eye  
On your close friend, yeah

Keep an eye  
Keep an eye  
Keep an eye  
On your close friend

'Cause what you got  
They'll make you lose  
And then turn around  
And step in your shoes  
I say they'll turn around  
And step in your shoes

I stood there numb  
Watchin' my friend walk away  
With my love on her arm  
She said was  
"Sorry for what I had to do  
But you see I love him  
Just as much as you"

Keep an eye  
Keep an eye  
On your close friend, yeah

Keep an eye  
Keep an eye  
You better watch out  
For your close friend

The devil workshop  
Is a busy place  
On top of evil  
There's an innocent face  
On top of evil  
He puts an innocent face  
She was just like a spider  
Only twice as smart

Kindness was a thread  
She used to weave my world apart  
There were three of us  
Seen all over town  
And now there's only two  
Someone's missing  
Guess who?

Now I see how she schemed  
And worked her way in between  
Planted seeds of mistrust  
To make us fight unaware

Her comfortin' ways, when I would cry  
Shadowed the look of triumph in her eye  
Just like a snake on the limb of tree  
A friend is an enemy you can see

Yeah, 'cause what you got  
They'll make you lose  
And then turn around  
And step in your shoes  
I say they'll turn around  
And step in your shoes

So you better keep an eye  
On your close friend  
You better watch out  
For your close friend

Don't trust nobody  
Don't trust nobody

Keep an eye  
On your close friend  
Keep an eye  
Keep an eye  
Don't trust nobody

Keep an eye  
On your close friend  
You better watch out  
For your close friend  
She was just like a spider  
Only twice as smart
