When all the trees that line the street turn brown yellow
and red
Times they are a changin' in all that lies ahead
But one thing is for certain in everything I do
I'm a child of the red, white and blue
I'm a child of the red, white and blue
America is beautiful, her amber waves of grain
We have faced a challenge, we have saved her name
While others may not get us... others surely do
I'm a child of the red, white and blue
America America still the land of the free
All across this land the people stand for the bells of
liberty
We celebrate our ancestry and embrace diversity
And every night I'm glad Old Glory flew
Cause I'm a child of the red, white and blue
When soldiers leave their families and sail across the
sea
We'll be home a prayin' to God for their safety
And we'll always remember in our prayers to you
Each is a child of the red, white and blue
I'm a child of the red, white and blue
America America still the land of the free
All across this land the people stand for the bells of
liberty
We celebrate our ancestry and embrace diversity
And every night I'm glad Old Glory flew
Cause I'm a child of the red, white and blue
When all the trees that line the street turn brown yellow
and red
Times they are a changin' in all that lies ahead
But one thing is for certain in everything I do
I'm a child of the red, white and blue
