I've got you and you got me. We've got it all and a cherry tree in the yard and love in the heart. Rooted in soil fed with the sun watered with care it has begun to grow the love in the heart. Love is beautiful. You're all I need to know. Baby let's not slow this thing down. Rooted in soil fed with the sun watered with care it has begun to grown the love in the heart. Boys and girls everywhere searching all over the place for one that's true and love in the heart. Romeo he had Juliet. He didn't know what he was getting into. Love in the heart. I had to search the world wide web to find the one that's when I found you and love in the heart. Boys will be boys and girls will be girls. Nothing will stop the way that their world turns but love in the heart. Love is beautiful. You're all I need to know. Baby let's not slow this thing down. Rooted in soil fed with the sun watered with care it has begun to grown the love in the heart. I've got you and you got me. We've got it all and a cherry tree in the yard and love in the heart.
