You'd better watch out, cause I like you
Good things make me vanish and go
If I find a common cure for this
I will also find that I am immune
You'd better watch out, cause I like you

I drew a schetsh on your sholder
I tatoed you on your birthday
You couldn't see what it said
Cause the blood and the bandage covered your arm
You'd better watch out, cause I like you

I watched your sleepingsound this morning
You might caught a glimt of me this night
Dissappear whit a disease I have
I'm not feeling well, so please don't pick up a fight
You should have watch out, cause I like you

And I will never learn from this
And you'll regret all the hugs and kisses
And I will never learn from this
And you'll regret all the hugs and kisses
And I will never learn from this

The tatoe that I left on you said best before right now
You should punch me in the stomache
And then you should hit me in the face
But you couldn't watch out, cause I like you

And I will never learn from this
And you'll regret all the hugs and kisses
And I will never learn from this
And you'll regret all the hugs and kisses
And I will never learn from this
