Before you walked into my life
Baby I was lost
I never dreamed that fate had planned a time
For our love to cross
No wheel of fortune stopped by chance
Could have lead to this romance
Falling in love with you
Was by design
Our love was meant to be, destiny
Everything we're feeling here tonight
Was by design,
Part of the master plan, Take my hand
You and I will spend our lives together.
The shadows of our past all fade
When I'm lying next to you
Since time began our hearts
They beat as one, I know you feel it too
Darling it's like we've always known
Our love was cut in stone
It was created only
Was by design

Our love was meant to be, destiny
Everything we're feeling here tonight
Was by design,
Part of the master plan, Take my hand
You and I will love, eternally
It is written in the sands of time
Forever yours, forever mine
And we will touch the part of us
That no one else can feel
Let it lift us up so high
Let it prove our love was
By design
Our love was meant to be, destiny
Everything we're feeling here tonight
Was by design,
Part of the master plan, Take my hand
You and I will love eternally
By design
Our love was meant to be, destiny
Everything we're feeling here tonight
By design,
Part of the master plan, Take my hand
You and I will spend our lives together
