"Nobody Left To Blame"

Until you put your spell on me
I did not know - who you are!
A little incantation now
You hypnotize the crowd

According to you
no-body else does matter now
According to you
nothing else does matter now

Your wings can spread around the world
Take all our sun away
Absorb the human pleasure dome
A lifetime in despair

I wonder how you lie to me
without the use of words?
I wonder why you came to me
without a look into my eyes?
