"You"

You(-das), You(-das)
Maybe you were not expected
And maybe I just wasn't either
Regarding you I speak in riddles
Only I can understand
Ease it all for I feel better
Still there's pity in this smile

Ease it all for I feel better
Better in my skin

You(-das), You(-das)
Justified in little whispers
And never waste a tear for this
Let me know when to feel guilty
Even though I should myself
Enter in this world of silence
Feeling comfortably embraced

You(-das), You(-das)
Embodied here - in no direction
Restless I reach out in time
Intimacy loosing face
Nowhere else you feel as mine

Knowledge never saves from mistakes
