"Autumn"

Visit "[Autumn](#)" on MotoLyrics.com

Autumn, your foliage falls in slow dance turning,

Infinite flying from the ancient trees,

And rolling in emerald green grass

Gradually dies.

And in fact, all seemed colorful recently

And among fading dying beauty

I saw all your endless despair,

All your bottomless sorrow.

You cover the tired ground

With foliage

And mysteriously embracing me

You kiss so passionately, and temping

And I would like to be with you only.
