Those hard feelings nowhere she'd need to say
Things like this they happened every day
We're two grown people and neither one's to blame
Sometimes things just work out this way
Well I never will get over you who could there ever will
be with you
You're part of me and whatever time may do I never
will get over you
[steel]
Please don't be sorry we shared a lot of life but nothing
last forever though they say
Don't you worry really I'll be all right sometimes things
just turn out this way
But I never will get over you...
No I never will get over you
