Wake up early in the morning sun arise
Confound the theory of evolution in your eyes
They don't want to tell you
They'll try to sell you
To dispel your fears
Listen here

We're all playing monkey see monkey do
We forgot what it's coming to
We're all playing monkey see monkey do
We forgot what it's coming to

Heads up patricidal monday afternoon
I've got a rope and a tire hanging in my room
I'm not at my station
It's a fine vacation
Happens every year
Listen here

I've seen cannibals in the night
They live like animals stalking each other
Just to have some peace of mind
See them following the eyes of the blind

It's all right later in the evening
Sun goes down
Everyone's caroling while the zoo is burning down
