Bye bye baby bye bye I won't try to even say why  
No use to sit and just cry this time baby it's baby bye  
bye

I walk the floor and wonder about you every day  
Never know what you're gonna do next or what you're  
gonna say  
I don't think your love for me is true  
For you couldn't do what you've been puttin' me  
through  
So bye bye baby bye bye...  
[ steel ]  
You don't understand anything I've ever said  
Cause you act like our love life is something you're at  
I can't seem to get inside to you so there's just one  
thing left for me to do  
Bye bye baby bye bye...  
Bye bye baby bye bye...
