What goes on in you mind
Don't say I'm the jealous kind
Think of all the promises we made now
You might find another girl
Living in you differend world
Hoping that you memory won't fade now

What you gonna do when the miles are growing
And you can't get with me
What you gonna do without me knowing
Please baby please

Don't forget to remember
When you leave my side
I'll be thinking of you
Don't forget to remember
Every day and night
I'll be dreaming of you

I will be thinking of you
I will be dreaming of you

Got a love built to last
It's the future not the past
Giving me these doubts insinde my mind now
Though I know the way I feel
Is one hundred percent real
I wonder can you stand the test of time now

What you gonna do when the smiles are flowing
And you can't get with me
What you gonna do without me knowing
Please baby please

Don't forget to remember
When you leave my side
I'll be thinking of you
Don't forget to remember
Every day and night
I'll be dreameing of you

I'm giving in to such a strange sensation
Missing you so tenderly (yeah I'm missing you)
What's needed here is all your good vibrations
Please baby please baby come back to me

Don't forget to remember
When you leave my side
I'll be thinking of you
Don't forget to remember
Every day and night
I'll be dreaming of you

Don't forget to remember
When you leave my side
I think of you
Don't forget to remember
Every day and night
I dream of you

Don't forget to remember
When you leave my side
I think of you
Don't forget to remember Every day and night
I dream of you

I will be thinking of you
I will be dreaming of you
