music: engler / words: d|rper

data spies are scanning me  
invasion of my brain  
they're digging deep  
they drive me mad  
i think i go insane  
a silent virus takes control  
and puts me on the screen  
my memory on empty hole  
no one to hear me scream

HIGH TECH HIGH TECH  
LOW LIFE

(repeat)

i drown in information/  
all systems overload/  
target of infiltration/  
last try to break the code/  
a silent virus  
(cont.)

HIGH TECH HIGH TECH  
LOW LIFE

(repeat)
