Yes it's a different world, the world the world you knew  
has all gone  
Have to make adjustments on the hoof, while you're  
still getting the plan  
Ride with it, just a little bit, oh yes confusion's thick  
But anyway, doesn't Candy look good  
Odessa Eyes I visualize them wherever I am  
No double trick, no backward glances  
Take a chance and ride with it  
Just a little bit, oh yeah  
Memory's bitter  
But doesn't Candy look good with it  
Really does it over and over  
Under the bright and mystical shelter  
Doesn't Candy look good  
Here's one you can forget about

And as the pain traces checking for mistakes you're  
sure were made  
The juices flow they do you know  
But you want to ride with it, just a little bit, oh yeah!  
This cloak can fit anyway, doesn't Candy look good  
with it  
Really does it over and over, under this bright and  
mystical shelter  
Doesn't Candy look good

Ride with it, save just a bit for me  
Cos I can feel it anyway  
And doesn't Candy look good with it  
Really born to it  
Doesn't Candy look good
