Here On The Hill

Right .. I own it but I've showed you a thousand ways  
You can't field it, the question no more, are you really  
that lame?  
There's no time for little heads, now you can't stay here  
on the hill

You've blown it, but you should have known I can stick  
like glue  
Sweating and surviving, making futures for you  
The favours you didn't re-pay now you can't stay here  
on the hill  
You can't stay here on the hill  
Here on the hill  
Here on the hill  
Ah! When daylight fades you can't stay here on the hill

Won't shake off that personal monkey so you can't stay  
here on the hill  
You can't stay here on the hill  
Here on the hill  
Here on the hill

The jury was out but there is no doubt now, you have no  
place  
No regrets, no sadness, just be on your way  
The Styx is crossed, no sense of loss, and you can't  
stay here on the hill
