Written by Billy Burnette.

Seems like this is gonna be one of those days  
I feel if as I reach the door  
The sun is covered by that same  
Old man-made haze  
California lives no more

I can't believe it's just been twenty years ago  
A lot of people got surprised  
Over-crowded cities, not a problem anymore

The end is near, we realize

So help! We need somebody not some artificial mind  
We've come across so many things  
We thought we'd never find  
Haley's Comet's gone  
We're barely holding on

Jesus come on back and take us all home
