The house next door just came up for sale
She's goin' home to Mama she says, "He can go to
hell."

The couple down the block are splittin' up, I hear
There the third one's on our street this year

It's just another day in Anytown, USA
Somebody's hurt, somebody's blue, somebody moves
away
What little they do to make it work don't seem to do
much good
When love moves out, there goes the neighborhood

First, they take off their wedding bands
They call it quits then call the moving vans
He takes his and she takes hers
And what's left over gets left out on the curb
It's just another day in Anytown, USA

Somebody's hurt, somebody's blue, somebody moves
away
What little they do to make it work don't seem to do
much good
When love moves out, there goes the neighborhood

It's just another day in Anytown, USA
Somebody's hurt, somebody's blue, somebody moves
away
What little they do to make it work don't seem to do
much good
When love moves out, there goes the neighborhood
When love moves out, there goes the neighborhood
