The company is sweeter
And I'm sure that you need a friend
It's not that you are weird
I'm surprised what you get through

So I'm coming down
And you're not around

It's you out on your own
If you say it's all for the good
There's no way you would know
Till you make your way to the end

So I'm coming down
When you're not around
So I'm coming down
When you're not around

So I'm coming down

So I'm coming down
When you're not around
So I'm coming down
And you're not around

So I'm coming down

Put me over your shoulder
You know what to say
Put me over your shoulder
You know what to say
