I find it funny how you think you know me,
Do you think all it's just a fucking game?
I've heard enough, so shut up and show me
Promise you you'll never be the same.

So come on, with your anger,
Come on, what you've got, my friend?
You think you know me well, you better think again.

Come on, come on,
You wanna dance with the devil
Come on, come on,
You better pray for a miracle.
Come on, come on,
If you survive this round
Stand it out and you'll be going down.
Come on, come on,
You wanna dance with the devil
Come on, come on,
You better pray for a miracle.
Come on, come on,
If you survive this round
Stand it out and you'll be going down.

I think it's time you put your money where your mouth is
Better live than leaving me in pain.
You know my name, but you don't know about this,
About the injure, about to get insane.

So come on bring the pressure,
Come on, have the casualty.
You think you know me well,
I think that you're mistaken.

Come on, come on,
You wanna dance with the devil
Come on, come on,
You better pray for a miracle.
Come on, come on,
If you survive this round
Stand it out and you'll be going down.
Come on, come on,

You wanna dance with the devil
Come on, come on,
You better pray for a miracle.
Come on, come on,
If you survive this round
Stand it out and you'll be going down.

I think you might underestimate,
I fight to intimacy.
Bet you better mistake to me,
So close to your enemy.
I hope you're ready for another round.
I'm never gonna back down, never gonna back down.

You think you got it, you think you got it,
You think you got it, you think you got what it takes to
bring me down.
To bring me down.

Come on, come on,
You wanna dance with the devil
Come on, come on,
You better pray for a miracle.
Come on, come on,
If you survive this round
Stand it out and you'll be going down.
Come on, come on,
You wanna dance with the devil
Come on, come on,
You better pray for a miracle.
Come on, come on,
If you survive this round
Stand it out and you'll be going down.

Come on, come on, we're going down
Come on, come on, you're going down
Come on, come on, you're going down
You keep going down.
