As if it was so easy to go (to go)  
A walk to something special before (before)  
And everything you want is to know (to know)  
How is waiting for me anymore?

The days are getting longer now  
In futuristic silence  
Does anybody anyhow  
Care about anything?

Now if you've lived in shadows before and you entered  
the light  
So now, what do you say?

Am I not always be wanting this? (x4)

Now if it was so hard not to return (to return)  
Why shouldn't I come back?  
A few things in my head raise a concern (a concern)  
It's because I lost track of you

Having disappeared from the past  
Waiting on the other side  
Funny in a certain way  
You found me, Here..  
In the night  
So please hit me now and put the light on, yeah

Am I not always be wanting this? (x8)
