Night life, ready to spit  
Evidence tag cross the planet  
Step it up this year, the time's right  
Sleep all day to wake up for night life  
Ready to spit when it drops, gonna hit  
We step it up, no doubt the time's right  
Sleep all day to wake up for night life

Start every verse with something to quote  
"The devil you know, is better than the Devil you don't"  
Last year a test, true colors where shown  
Kings remained in chess on the board and life in  
thrones

Music catch the force of my mic  
That's why at night I be out postin' up my own snipes  
For years I sat back, played the role, what for?  
This here disc, hear us raw, can't fake it anymore

Check it out, you now witness the scenes  
Second release, Expansion Team  
Shit thumps, shine bright headlights, Xenon  
The like laser beams drive fast things and tee green

Night life, ready to spit  
Evidence tag cross the planet  
Step it up this year, the time's right  
Sleep all day to wake up for night life  
Ready to spit when it drops, gonna hit  
We step it up, no doubt the time's right  
Sleep all day to wake up for night life

You know these nights ain't gettin' any longer  
Put your best out and bail  
You never know, you might get stronger  
I stood back a bit, take punchlines out raps been more  
legitimate

Solidify our place in the game, pleasure with pain  
Tropical flow, see sun but feel rain  
It's easy to secrete yourself up in the mix  
That's why it's good to get out at night and holler at

chicks

I take it back before studio racks  
Before I understood the concept of seperatin' tracks,  
before  
Around the time my life when I swore  
That the mic was a device not to be taken light

Night life, ready to spit  
Evidence tag cross the planet  
Step it up this year, the time's right  
Sleep all day to wake up for night life  
Ready to spit when it drops, gonna hit  
We step it up, no doubt the time's right  
Sleep all day to wake up for night life

Night life, graffiti artists get armed  
Cans get shook, the walls get bombed  
This is the time when shadow rocks get thrown  
At your tinted car windows sound off the alarm

This is the time you execute your plan  
While other people sleep, jewels get ran  
In get away vans exit off ramps  
Smaller operations are shops bigger one camps  
Rock knots in pocket pants

Got the advance and back for my back end in hands  
And things ain't always what they seem from a glance  
But up close shit'll change your whole perspective  
Shadows close in, you realize you ain't protected

Night life, ready to spit  
Evidence tag cross the planet  
Step it up this year, the time's right  
Sleep all day to wake up for night life  
Ready to spit when it drops, gonna hit  
We step it up, no doubt the time's right  
Sleep all day to wake up for night life
