F/ DJ Babu

Babu cuttin' it up "Stay strong"

Iriscience-

Hey, yo we potent, straight up, straight the dope wait
up

But hold up, wait up, exactly what you 'fraid of
Maybe it's my words that got you scared enough to
hate us

But see, i got vert like them half-pipes ya' skate up
I take flights up to heights then return to perch
Make the most of one life until death brings re-birth
Whether re-incarnated according to my words
Maybe burried underground to help feed the earth
I never followed the same, never bought up the
treasure

Don't wallow in pain, and don't get caught up in
pleaseure

Every word is an expressive thought manifested
Like Xzibit said 'More than an image is opressed kid'
Stay under pressure and that's right, you guessed it
I proclaim the Dilated platform the freshest
My method's undetected, and then suddenly i grab you
MC Iriscience and my DJ's name is Babu

Straight cuttin' it again

Chorus (Iriscience)

The strength to maintain, the strength to change
The strength to make moves, the strength to stay
The strength to hold on despite the pain
The strength to not rock the mic in vain

Evidence-

Yo, my kindness ain't no weakness, confess less than
often

My strength at point blank rocks the objects without
caution

Switch to infrared, dead lock and pin point
The shadow in the corners cover mimes smoked with
joints

Follow ya' moves, knew where ya' were before you go
there
Camouflaged cab driver, took ya' fare
That was i, fake beard for disguise
Contact lenses change the color of my eyes
Certified not a spy, my name is real
I don't lie, no documents to steal
Yo, to flatter ya' self to me is a cheap jab
Plus i'm dealin' with these cats tryin' to break into my
lab
Trust me when i say, it take strength to walk away
Clench ya' fist, calm demeanor like this
Yo, it takes my farther, that's proven beyond theory
Strength, never have to hold my eyes back from gettin'
teary

More dope cuts

Chorus x2

What we callin' this one?
Strength, that's real
Yo Babs, where ya' at?
