Good morning you
people all around the world
every boy and every girl

I send you all my love
knowing day will be just fine
my heart is full and free

Love is all
love is light
love is always on our
side always shine so bright....

love is all we need
just clap your hands and set it free
sing a song of love and peace with me
you can even sing it out of key
sing it now loud and clear
love is everything we need

good morning you
deep blue ocean mountains too
sky-how do you do

my heart belongs to you
you are part of my life too
and our love is true

Love is all
love is light
love is always on
our side always shine
so bright..
