"Yeah We Know"

Visit "[Yeah We Know](#)" on MotoLyrics.com

Drivin hard through your friend Gotta find a way to
mend The less we see, the more it grows Festering out
of control Piled High You get that face, I wonder why we
ever got it together What's to say Just no clue, we just
know what to do Hope it comes together It's the norm,
float again It's the stuff you said you send Take it in,
Wait to see If it's enough, just 'cause it's free Push too
far Feel the skin begin to scar Can't really put it
together Now it's a drag With no hope of coming back
How can you ever get it together?

[Solo] Bottled up, stored away Always ready to give
way Push it farther, yeah we know Clinging, hoping it
won't show Piled High You get that face, I wonder why
we ever got it together Push too far Feel the skin begin
to scar Can't really pull it together About to crack With
no hope of coming back How can you ever get it
together What's to say Just no clue, we just know what
we do Hope it comes together
