Take the short way home

You've been makin' up your mind  
And I can save you from the trouble that your heart is  
goin' through  
And I can tell you what your future's gonna be  
Maybe we can open up your eyes  
Baby, you can't leave me now

There is lightening in the city  
Stranger than you ever saw  
Get back to your special lover  
And I won't ever turn on you  
Or tell you you should tell me where you go

Take the short way home  
Baby, take care of your health  
In this world of evil  
I can't keep you to myself

Take the short way home  
You'll be safe here by my side  
In this world of evil  
I can't keep you satisfied

And you can make it easy on yourself  
Some other love will call my name when you're away  
and I'll be gone  
And there's no other who could love you more  
I keep talkin' to myself when I'm alone  
I don't wanna be alone

Crazy people in the shadows  
Love is only what you find  
Come back here and you'll discover  
There ain't nothin' you've been searchin' for  
I could not give you now if you are gone

Take the short way home (Home)  
Baby, take care of your health  
In this world of evil

I can't keep you to myself

Take the short way home  
You'll be safe here by my side  
In this world of evil  
I can't keep you satisfied

Crazy people in the shadows  
Love is only what you find  
Come back here and you'll discover  
There ain't nothin' you've been searchin' for  
I could not give you now if you are gone

Take the short way home (Take the short way home)  
Baby, take care of your health (Take care of your  
health)  
In this world of evil  
I can't keep you to myself (Hey, hey)

Take the short way home (The short way home)  
You'll be safe here by my side (Be safe here by my  
side)  
In this world of evil (Yeah) I can't keep you satisfied  
(Can't keep you satisfied)

Take the short way home (Take the short way home)  
Baby, take care of your health (Take care of your  
health)  
In this world of evil (Oh)  
I can't keep you to myself

Take the short way home  
You'll be safe here by my side (Right by my side)  
In this world of evil  
I can't keep you satisfied (Yeah, yeah)

Take the short way home (Home)  
Baby, take care of your health (Oh, yeah)  
In this world of evil  
I can't keep you to myself

Take the short way home
