[Verse 1]

You will always be an angel in my eyes  
Blues and grays you been by my side  
When my worlds crashing and pains intense  
You calm my soul with perfect sense  
Bring me back to earth, show me gems  
Thank you for being my friend

(Chorus)

Forever and a day  
You will be my everything  
Forever and a day  
You're my divine, the reason that I shine

[Verse 2]

You always believed in my dreams  
Even when we were kids and our job was just to live  
Anytime of day wiped my tears away  
You protected me laughed my fears away  
There's no one (no one) in this world  
Who could ever take your place?

(Chorus)

[Verse 3]

We've been through joy and pain  
Taken different paths still the loves the same  
Your light shines all over me  
Help me keep prospective, I know it ain't easy  
You should know (you should know) I'd die for you  
Call my name and I'll find you

(Chorus)
