

## Dirty Heads "Check The Level"

Visit "[Check The Level](#)" on MotoLyrics.com

Her name was Lilly, his was Todd  
She was tall, and he was odd  
And all the other girls said she was too fat for the  
squad  
She just wanted friends  
He just wanted broads  
He'll do anything for pussy, change his ways he swore  
to God  
He needs to straighten up  
He isn't smart enough  
I wouldn't be his date  
He doesn't dress like us  
Remember all the times that he got beat up on the bus  
But what he learned from that was to be careful who  
you  
trust  
He knew that they were wrong so he took it with a yawn  
He knew his time would come and he'd be moving on  
So he locked himself inside a room and started writing  
songs  
You could catch him in the back of class singing all  
along like

Check the level cause something's coming over me  
Check the level cause something's coming over me  
Check the level cause something's coming over me  
Something's got a hold of me, always controlling me  
It's in the audio, it's in the air  
It's in the way you move, it's everywhere  
It's something beautiful, that you don't know  
So feel the audio, and let it go

So back to miss lily when she used to let the days pass  
Sitting home alone sucking food up off her placemat  
They used to call her fat so she started losing weight  
fast  
Got sick in debate class, to throw up what she ate last  
She didn't know that the things they said that left her  
hurting  
Would actually turn out to make her a better person  
She locked herself inside her room got to the  
rehearsing

Walking down a runway in a dress she made from  
curtains

So she started slimming up  
She was tall enough  
She became a model she was paid and she was loved  
See what they thought they knew about these two was  
givin up  
Cause no matter what they said these two just didn't  
give a fuck  
They had it all along they just figured it out  
How to take the negativity and turn it all around  
Now lily's turning heads up on the runway in Milan  
And Todd is selling millions while his fans sing along  
like

Check the level cause something's coming' over me  
Check the level cause something's coming' over me  
Check the level cause something's coming' over me  
Something's got a hold of me always controlling me  
It's in the audio, it's in the air, it's in the way you  
move  
It's everywhere, it's something beautiful, that you  
don't know  
So feel the audio, and let it go  
It's the six string slayer the rhyme cultivator  
Picking' home grown rhyme straight out the incubator  
Cross fade to the right while I slide to the left  
There's something coming over me controlling every  
breath  
Gasping for air my fears burn through

There's something in the audio then what they said was  
true  
Full speed ahead code red phase two  
The sound waves control the minds of me and you  
It's in the audio, it's in the air  
It's in the way you move, it's everywhere

It's in the audio, it's in the air  
It's in the way you move, it's everywhere  
It's something beautiful, that you don't know  
So feel the audio  
And let it.....go
