5:07)

last night it was a motel 6  
tonight it's a hyatt on the 76th floor  
we're all coming from a tiny town  
but I got a plan, I thought we'd make a rock n' roll band  
see the planet, take a bite of the land  
oo baby it's okay  
there's a rumor going round this town  
oo baby it's all right  
i'm gonna sleep by myself tonight  
kiss the world good night  
we just hit mile three thousand thirty three  
we're heading west on interstate 80, 'cause  
somebody said this planet is round  
nevada is green and it's the middle of june  
i don't know their names but they were singing our  
tunes  
brussel sprouts is the only cat putting me down  
oo baby it's okay?  
idols crumble at my feet  
i'm strong because their lies are weak  
the musak in the mall is giving me the creeps  
the hotel's full of tv's  
thick with sick macho social disease  
the holy ghosts of hosts is just so fake  
and i swear, if i ever make it there  
i'm gonna love out loud till my heart breaks  
till my heart breaks  
i'm gonna kiss the world good night
