

Disappear Fear "Play The Music"

Visit "[Play The Music](#)" on MotoLyrics.com

6:39)

Could it be, yes it could, play the music that feel so
good

Like a pie in the sky

Eat it up for the perfect high

How many of us are in this room

I dare you to look into my eyes

How many of us can get the nowness of this tune

Just enough to enlighten all the skies

Some say you should leave it

But I say unto you you should believe it

And actually this is exactly as you would

Come on play me the music that feels good

All of us are in this marathon

Sometimes I see myself running a mile behind

Then some kind stranger allow me to find

All the time the illusion was in my mind

Some say you should leave it?

Why do you stay

So long away

So long away
