* I remember it completely, and yet i can't recall any
sunrise before it.
I watched the whole magnificents of the dawn for the
last times as if it where the first.
And then I said farewell to sunlight and set out to
become, what I became. *

Down down down
God three times in me
More than useful
Bring me down where i
Deserve to be
The fear in your eyes (x4)
Like seeing your fate unfold before you
But nothing, nothing can save me from your vampiric
love
Drink the blood
Sink your teeth into me
For the first and last time
Do you like
The pain it brings?
The fear in your eyes
Like seeing your fate unfold
Before you.
