Ol am the light and the savior, I am the one who brings
death to mankind

The bringer of silence, the source of life, hammer of
justice, sword of light
Conflict will end uneasy peace, humanity's finest
destructive art
Winds of war tear the world apart

Nations will crumble and new will arise, rising from the
ashes "the one" emerge
Written in blood history repeats itself, again and
again in a ravenous purge

Strong defeat the weak, we're always at war

There is no peace has ever been, man killing man
Sword of light, burning bright, hand of doom, death to
you all

Shattered existence, survivors struggle to rebuild
Sword of light, might makes right, dwan of damnation,
awaits us all
Dance of death, burning world drowned in flames
