up,down,up!

when i up,down,touch the ground it puts me in the mood.

up, down, touch the ground in the mood (hehehe) for food.

I am stout, round, and i have found speaking poundage wise,
I improve my appetite when i exersize!

I am short, fat, and proud of that and so with all my might, I up,down,
and up and down to my appetite's delight! while i up,
down and touch
the ground, i think of things to chew...(like honey). with
a hefty, healthy
appitite i'm a hefty happy pooh!
