Heres the chance to express your liberty No-one but
you can know what stepping down can mean Despotie
leader kills the bravest traitor on the street But keep
the faith They say they'll free us (me) from our pain
They sell you a religous escapade You join the church
and they take your life away! Shameless money, eat
your money, eat your vultures quick But keep the faith
They say they'll free us from our pain, but, You liberty
is exchanged I said you liberty's exchanged Are your
liberties exchanged?.
