I wanna turn but you have got me in a haze
There is no part of you I'm not into
And I'm dying just to tell you baby
I wanna see you move and I wanna feel you shake
I wanna know everything about you that you try hiding

Cause you take my breath away, now I'm suffocating
There is nothing in our way

So let's make this night a night we never will forget
Don't wait, cause I want every minute I could get with
you
Stay, after tonight you'll never feel the same
I could see it in your eyes, I'm your last call romance

You're showing me a side you've never shown before
I wanna know all your ways and how you taste
And I'm trying just to drive you crazy
I wanna see all of the little moves you make
I wanna know everything about you that you keep
hiding

Cause you take my breath away, now I'm suffocating
There is nothing in our way

So let's make this night a night we never will forget
Don't wait, cause I want every minute I could get with
you
Stay, after tonight you'll never feel the same
I could see it in your eyes, I'm your last call romance

So let's make this night a night we never will forget
Don't wait, cause I want every minute I could get with
you
Stay, after tonight you'll never feel the same
I could see it in your eyes, you're my last call romance
My last call romance
This romance
