"Mirrors"

Visit "[Mirrors](#)" on MotoLyrics.com

Under a starlit sky i wait for you
You wait for me under your watchful eye
The shadows look for me
All my mistakes i find reflected back at me
The sorrows of the past no longer capture me

You hold me and encircle me with love

Keep me safe
Keep me in your arms
I don't ever want to fall away from you
My God i need you can't live without you

And the only reflection i see is yours

Under a bloody moon i search for you
You look for me i know i will find you soon
You are too close to see
My feet are running my heart wonders will it be the
same
And i know
Its true you'll never look away

So i turn my eyes to you my love
