If you want love, you gotta love somebody
If you wanna be happy, stand in line
If you're feelin' lost, you better find somebody
And if you're lookin' for truth, don't tell lies

If you don't want problems, walk away (walk away)
If you hurt somebody, you know you're gonna have to
pay
If you don't wanna dance, don't strut your stuff
And if you don't like fightin', don't play rough

Day in, day out, they will wear you down
Choose or lose, they turn your blues to brown
Float upstream as all your dreams go down

If you need somebody, you gotta let them know
It's all right, don't be afraid, to let it all let go
And it's all right, if you wanna be free
And if you can't love somebody, let them be

Daytime, nightime, lonely lifetime bound
Miles and miles of hopeful smiles, turned round
Float serene while all your dreams go down

If you're diggin' for gold, you gotta work real hard
Fly over the moon, you gotta go real far
If your heart say "Yes", then don't say "No"
And if you find what you're after, don't let go

Day in, day out, they will let you down
Miles and miles of hopeful smiles, turned round
Daytime, nightime, lonely lifetime bound
Float upstream as all your dreams go down

You gotta love somebody, better find someone
