"Still Be Here"

Visit "[Still Be Here](#)" on MotoLyrics.com

I thought today would play out just like any other
I'd wake up and find you here so happy
If I could change the past, then I would
In a single heartbeat
I would make it last and maybe you would...

You would still be here
You'd still be near

I thought tonight would play out just like any other
I would sleep right here with you so happy
If I could change the past then I would
In a single heartbeat
I would make it last and maybe you would...

You would still be here
You'd still be near
You would still be here
(If I could take you back then I would)
You'd still be near
(If I could change the past then I would)

Why won't you?
Why won't you?...

Only in reality can I find you in dreams
Only in reality can you find me in dreams

Why won't you?
Why won't you?...

You would still be here
You'd still be near
You would still be here
(If I could take you back then I would)
You'd still be near
(If I could change the past then I would)
