Lets go back to the start here

Alright wake up everybody this party is just getting started

It's dark lets go out tonight

Come on

I've seen so many faces

Your pictures on my wall

I have all these memories

I'm dying to know who you are

All the years that I celebrate

They are between just sitting here smiling away

Cause I can't feel a thing

You're all the same, till you die

Somethings never change

You're just another bitch

Backed up against the wall

It'd probably be much easier

If you were here with me right now

Alone is much more difficult

Than I could have ever realized

Lets blow the roof of this place

Oh lets give em hell

This goes back to road anyways

5, 6, 7 hit the road

5, 6, 7 hit the road

Yeah...

With no one to hold you

No one to guide you, to the light

No one to say that, things will be alright

I'm watching what I thought was the truth

All along (all along), it seems that

I've been deceived, it's all just one

It's all just one big lie

I tried so hard

You're not worth this

Popularity is overrated
In a matter of seconds my future
Has nothing left (nothing left)
Has nothing left

Where were you
When I needed you most
(When I need you most, where are you last night?)
Where were you
When I needed you most
(When I need you most, where are you last night?)

Drink the poison from the glass (x8)
