(Billy Walker)

(There may be no tomorrow so love me forever tonight)
Uncertain is our world for nothing in our world is right
These moments together must remain with me ever in
sight
There may be no tomorrow so love me forever tonight.

The future's a fast changing picture no one can
foresee
The power to change what's ahead wasn't meant to be
No matter what happens our love will make everything
right
There may be no tomorrow so love me forever tonight.

There may be no tomorrow so love me forever tonight...
