My belly aches from you
And the countless times that I try to relate to you
Knowing that I bit off more than I can chew
My mouth is full of words that taste as bad as you
Swallowing my tongue sounds like the best in store for
me
It's got to be for me

So long sing away good time
This is my goodbye
This is my farewell (x2)

I love again
I love again

Hey here's the second part
The charge is set and I don't wanna wait around to see
what happens next
It's too late I said this charge is set
The fuse is lit and I don't wanna wait around
Running outta time
If I were you I'd run as fast as hell

So long sing away good time
This is my goodbye
This is my farewell (x2)

I love again
I love again
