You only take heat when you need to
You only take heat (E) when you need to
And you need to

Come let me brief you
And let you see where greed leads to
And you need to

Inspire the love inside your people
Our people, equal
[For teens oh] knows people, no [spyads]
No more hellfires and please no more gunfire

Dance 4 Life (4x)

Quench we [meable] in thirst
Put them first

And when the floodgates burst
Come inside and we'll keep you strong

We protect the children of this new dawn
We're properly skilled and we fear no storm
And what we're building will persevere long
After the wicked 'em disappear

Justice, dues and rights gone clear
And the and the youth we have will start this year
And the youth we have will start this year

Dance 4 Life (12x)
